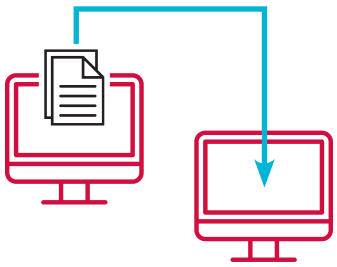
MVP HEALTH CARE



MVP Invites You to Connect With Us

Granting MVP Health Care® remote access to your electronic medical records (EMRs) helps your practice run more efficiently.

Connecting MVP with your EMRs will enhance collaboration related to:

- Annual HEDIS® medical record reviews
- Year-round gaps in care closures
- State-mandated medical record studies
- Utilization and risk adjustment requirements

Granting remote access to your EMRs will also:

- Reduce incoming calls for record requests
- Reduce office staff time locating medical records
- Reduce office staff time faxing or copying and mailing records to MVP
- Reduce copying costs
- Eliminate follow-up calls to your office for re-faxing records due to missing charts, wrong records, or illegible copy
- Eliminate the need for medical record vendor services
- Improve PHI security by not mailing medical records
- Eliminate nurse reviewer on-site visits and disruption to office routine and resources

Ready to make a connection?

The MVP IT department will work with your office's IT staff to establish a successful and secure connection to safeguard our members' PHI.

Contact Debra Carr at **585-327-2267** or **dcarr@mvphealthcare.com** today to get started.
