Medication Treatment During a Visit In 2024	HCPCS: G2067, G2068, G2069, G2070, G2072, G2073, G2078, G2079, G2086, G2087, H0020, H0033, J0570, J0571, J0572, J0573, J0574, J0575, J2315, Q9991, Q9992, S0109

Tips and Best Practices to Help Improve Performance

- Medication education is most successful when a patient knows why they are taking a medication and its purpose
- Review expected side effects and medication interactions; discuss a plan for patients to respond to side effects including how/when to notify their provider
- Encourage the use of a medication diary to keep track of doses; educate Members about the importance of adhering to their medication regimen, and what to do if a dose is missed
- Provide written documentation to your patients to ensure their understanding
- Review importance of continuing the medication even if the Member is feeling better
- Encourage follow-up visits and schedule next appointment at the end of the visit
- Elderly patients may benefit from the help of family members who can assist with medication cueing, set-up of pill organizers, drug charts reminder calls, etc.
- Utilize your monthly Gaps in Care (GIC) report for a list of MVP Members and the services they still need
- Call MVP Customer Care Center for Provider Services at **1-800-684-9286** for case management guidance, home care referrals, and other community support available to assist Members and their families
