Tips and Best Practices to Help Improve Performance

- Each encounter is an opportunity to discuss wellness and provide preventive care services; this is important for parents whose compliance with medical care cannot be ensured—for these patients, consider incorporating well components with sick visits
- Services may occur over multiple visits if all components are addressed within the specified timeframe
- Yearly physical examinations should include most if not all the major body systems
- Health Education/Anticipatory Guidance should be discussed and documented at least once per calendar year
- Submit all results to your local Regional Health Information Organization (RHIO)
- Utilize the monthly Gaps in Care (GIC) report for a list of MVP Members who need preventive care services
