Tips and Best Practices to Help Improve Performance

- Utilize the monthly Gaps in Care (GIC) report for a list of MVP Members and the screenings that they still need
- Consider using alerts or flags within the electronic health record (EHR) for screening tests
- Discuss the importance of early detection and encourage preventive care screenings—refer annually if needed
- Document medical and surgical history, and preventive care—include the specific date and the result
- Submit all test results to your local Regional Health Information Organization (RHIO)
- Use correct diagnosis and procedure codes and submit claims and encounter data in a timely manner
- Stock patient areas and exam rooms with screening educational materials such as those found here:
