**Patients who died any time during 2023****Tips and Best Practices to Help Improve Performance**

- Reach out to Members as soon as you are notified of their ED visit to schedule a follow-up visit
  - Follow-up care for people with mental health conditions can result in fewer repeat ED visits, as well as improved physical and mental function and increase compliance with follow-up instructions
- Receiving timely information from hospitals can assist in faster follow-up
  - Consider utilizing your health information exchange (HIE) to gain more information on ED discharges or by working collaboratively with ED's to obtain data exchange reports on your patients to improve care coordination
- Consider maintaining appointment availability in your calendar dedicated for patients with recent ED visits to ensure they can schedule follow-up appointments in a timely manner
- If a mental health provider has treated your patient, inquire about recent hospitalizations and the last time they had a visit with their mental health provider; assist in scheduling an appointment with their mental health provider before they leave the office
- Consider outreach to reschedule for Members who cancel their appointments or do not show up
- Refer Members to appropriate behavioral health providers in their area
- Utilize your monthly Gaps in Care (GIC) report for a list of MVP Members and the services they still need
