## Diagnosis Matching Edits Policy Update

MVP Health Care® (MVP) utilizes diagnosis matching edits based on select Medicare Local Coverage Determinations (LCD) or National Coverage Determinations (NCD) for procedures.

Effective January 1, 2019, MVP will adopt the Centers for Medicare & Medicaid Services (CMS) LCD or NCD to access the appropriate diagnosis to be used with the following procedures as outlined in the applicable LCD or NCD.

CPT Code	CPT Code Description
82306	Laboratory examination Vitamin D 25 Hydroxy, includes fraction of performed
82652	Laboratory examination Vitamin D1.25, includes fraction if performed
82607	Laboratory examination Cyanocobalamin vitamin B12
84443	Laboratory examination Thyroid Stimulating Hormone
84436	Laboratory examination Thyroxine; total
84439	Laboratory examination Free- Thyroxine; total
84479	Laboratory examination Thyroid Hormone (TS or T4) uptake or Thyroid Hormone Binding ratio (THBR)

For more information on Medicare Local Coverage Determinations, please visit [cms.gov](https://www.cms.gov) and select the *Medicare Coverage Database*.
