

Follow-Up After Emergency Department Visit for People with Multiple High-Risk Chronic Conditions (FMC)

Patient Profile

MVP Medicare Members 18 years or older with multiple high-risk chronic conditions who had an emergency department (ED) visit and a follow-up service **within 7 days of that ED visit**.

Measure Details

Medicare Member with two or more chronic conditions **diagnosed prior to the ED visit**.

Eligible chronic conditions:

- COPD/Asthma/Unspecified bronchitis
- Dementia/Frontotemporal dementia
- Chronic kidney disease
- Major depression/Dysthymic disorder
- Chronic heart failure/Heart failure diagnosis
- Myocardial infarction
- Atrial fibrillation
- Stroke/Transient ischemic attack

Exclusions

- Medicare Members in hospice care
- ED visits that resulted in an acute or non-acute inpatient stay, occurring on the day of the ED visit or within 7 days after the ED visit

Inclusions

Acute inpatient stays prior to the ED visit in the measurement year (MY) or the year prior would count towards meeting the denominator.

How to Implement Best Practices and Improve Performance

Reach out to the Medicare Member as soon as you are notified of their ED visit to schedule a follow-up appointment (**the 7-day follow-up appointment can be the same day as the ED visit**).

Receiving timely information from hospitals can assist in faster follow-up. Consider utilizing your health information exchange (HIE) to gain more information on ED discharges or working collaboratively with hospital ED's to obtain data exchange reports for your patients seen in the ED for better care coordination.

Consider maintaining regular appointment availability in your schedule for Medicare Members with recent ED visits to ensure they can get an appointment in the designated time frame. This can be especially important around weekends and holidays when access to a Provider's office is more difficult.

Provide ongoing education to all your patients to follow-up with their health care providers as soon as possible after an ED visit for any reason. Continuous reinforcement may help establish learned behaviors.

Include telemedicine, telephone, e-visits, and virtual check-in visits to identify all visits with chronic condition diagnoses.

The following meet criteria for the 7-day follow-up visit:

- Outpatient visit
- Telephone visit
- Telemedicine visit
- Transitional care management services
- Intensive outpatient visit
- Community mental health center

Follow-Up After Emergency Department Visit for People with Multiple High-Risk Chronic Conditions (FMC)

- IET stand-alone visit
- Online assessment (e-visit or virtual check-in visit)
- Case management encounter
- Complex care management
- Behavioral health visit in outpatient or telemedicine setting
- Partial hospitalization
- Electroconvulsive therapy
- Ambulatory surgical center
- Observation visit
