MVP® HEALTH CARE | Core Analytics

An industry-leading tool for qualifying employers and brokers. Now you can optimize your benefit plans using best-in-class analytics and data integration technology.

Get Out in Front of Trends

Be better prepared to address changing needs. Put MVP Core Analytics to work for your business and start making smarter decisions about your benefit plans.

- Unlock meaningful analytics through our easy-to-use interface.
- Take advantage of standard reporting packages or create your own.
- Print, share, and save customized reports.

Access Data More Easily

The MVP Core Analytics dashboard provides instant access to the features and tools you need most.

- Get an "at-a-glance" view of key performance indicators.
- Drill down to more closely examine and identify cost drivers.
- Create custom visualizations to highlight the most useful information.

Use Data More Effectively

With MVP Core Analytics, you'll quickly discover how easy it is to:

- Make proactive data-driven decisions.
- Spot trends with the ability to drill down to pinpoint causes.
- Compare timely data with established benchmarks (Note: data refreshes approximately on the 15th of the month with data through the end of the previous month).
- Identify specific cost drivers.
- Ensure HIPAA compliance with role-based security.

Leverage Dynamic Reporting Tools

From highly formatted, print-friendly Word and PDF documents to customized interactive reports, MVP Core Analytics gives you the tools you need to organize and present the most meaningful data for your business.

Standard reporting options include:

- Membership summary and enrollment
- Financial overview and trend reports
- Medical cost and utilization trends
- Pharmacy cost and utilization trends (if pharmacy benefit is offered through MVP)

Or, create your own reports. With MVP Core Analytics, you can modify content and design reports to meet your specific needs using tables and graphs.

Discover the benefits of a true end-to-end data solution with unprecedented flexibility.

See what MVP Core Analytics can do for you.
