2018 PRESCRIPTION DRUG FORMULARY

EFFECTIVE November 1, 2018

Your physician is the person best suited to help you make decisions about prescription drugs, and the prescription drug information below is intended for consumer guidance only. This information relates to the Prescription Drug Formulary, generally, and may not describe your particular coverage. Your Member Handbook determines your benefits, limitations and exclusions.

While every effort has been made to insure accuracy, some information may be out of date. The Formulary is subject to change based on decisions made by the Pharmacy & Therapeutics (P&T) committee. New drugs are not covered until reviewed by the P&T committee. Medications with an over-the-counter equivalent are not a covered benefit. Drugs entering the market between 1938 and 1962 that were approved for safety but not effectiveness are called "DESI" drugs. DESI drugs are not covered on the Medicaid Formulary.

Coverage is limited to a 30-day supply of medication at a participating retail pharmacy. The Plan may limit coverage to a specific quantity or a specific course of treatment. The Plan may also require prior authorization on some covered drugs. If you need more information about policies regarding a specific drug, consult your physician or contact the Customer Care Center. If the medication you take is not listed below, contact the CVSCaremark Customer Care Center at the phone number listed on your identification card.
