[†] Unless otherwise noted in the chart above, all plan deductibles and/or out-of-pocket maximums (OOPMs) are embedded.

All plans include dependent care to age 26. NOTE: Benefits shown in red represent a change from the 2018 plan.

The Difference Between an **Aggregate and Embedded Plan**

Aggregate (AGG): For any policy with two or more members. the deductible must be met by any one or any combination of members before the plan will make payments.

Embedded: Each member pays toward, but never exceeds, their individual deductible and/or OOPM until the larger family deductible and/or OOPM is met. Once the family deductible and/or OOPM are met, the plan makes payments for all services of all members on the contract, regardless of the status of any remaining individual deductible and/or OOPM levels.

* Member amount after the deductible is met. **NoDD:** Not subject to deductible

Standard vs. Non-Standard

Standard plans are based on what the State dictates must be included in benefit details. Non-Standard plans contain unique features that enhance the value of the benchmark benefits.
