

Antidepressant Medication Management (AMM)

Patient Profile

MVP members 18 years of age and older, with a diagnosis of major depression, and who are being treated with antidepressant therapy. You need to ensure member compliance in taking their medication. Two rates are reported: The percentage of members who remained on an antidepressant medication for at least 84 days (12 weeks) and the percentage of members who remained on an antidepressant medication for at least 180 days (6 months).

How to Implement Best Practices and Improve Performance

- Schedule time with the patient and provide educational materials that address the following:
 - When will the medication start working and how will the patient know that it's working?
 - What will it feel like to be on the medication?
 - How long will the patient need to be on the medication?
 - What are the possible side-effects and what should the patient do if they experience any?
 - Stress the importance of continuing medication, even if the patient is feeling better.
 - Reiterate the importance of attending follow-up visits.
- Elderly patients may need medication cueing for successful adherence. A family member may be encouraged to call patients, do a medication set up, or create a drug chart that allows the patient to see when the medication is due to be taken. It may also include helpful tips on what to do if concerns arise, such as when a dose is missed or who to call when there are side effects.
- Call MVP Customer Care Center for Provider Services at **1-800-684-9286** for case management guidance, such as home care referrals, in order to teach medication management strategies and inquire about other community support that may be available to assist patients/families.
- Family engagement around the health care needs of the patient is a big part of a successful plan of care.

Information related to all 2021 HEDIS measures has been extracted from the NCQA 2021 HEDIS Technical Specifications Volume 2.

The medication list on the following page is used when evaluating the measure criteria noted above. For information on medications covered by MVP, see the *MVP Medicaid Drug Formulary* available by visiting mvphealthcare.com and selecting *Providers*, then *Pharmacy*, then *MVP Formularies*.

Examples of Antidepressant Medications

Use of the drugs listed here will score the measure as compliant. Visit [ncqa.org](https://www.ncqa.org) for a comprehensive list of antidepressant medications.

Miscellaneous Antidepressants	Bupropion	Vilazodone	Vortioxetine		
Monoamine Oxidase Inhibitors	Isocarboxazid	Selegiline	Phenelzine	Tranylcypromine	
Phenylpiperazine Antidepressants	Nefazodone	Trazodone			
Psychotherapeutic combinations	Amitriptyline-chlordiazepoxide	Fluoxetine-olanzapine	Amitriptyline-perphenazine		
SNRI Antidepressants	Desvenlafaxine	Levomilnacipran	Duloxetine	Venlafaxine	
SSRI Antidepressants	Citalopram Sertraline	Fluoxetine	Paroxetine	Escitalopram	Fluvoxamine
Tricyclic Antidepressants	Amitriptyline Protriptyline	Desipramine Clomipramine	Nortriptyline Imipramine	Amoxapine Triipramine	Doxepin (>6mg)
Tetracyclic Antidepressants	Maprotiline	Mirtazapine			

Use of drugs listed here will score the measure as compliant. Remember to reference the MVP Formulary to learn which of these medications are covered by the member's plan.

2021 Coding for Antidepressant Medication Management (AMM)

Codes for AMM	Use of any of the following codes with any diagnosis of major depression will identify the eligible population for AMM.
Acute Inpatient	CPT: 99221-99223, 99231-99233, 99238, 99239, 99251-99255, 99291
BH Outpatient	CPT: 98960-98962, 99078, 99201-99205, 99211-99215, 99241-99245, 99341-99345, 99347-99350, 99381-99387, 99391-99397, 99401-99404, 99411-99412, 99510
